2027 Syllabus

Finding Physics

a comic guide
with student activities

Wendy Pan
Illustrated by Cheylon Devine

Second edition published 2026

First edition published 2024

© Wendy Pan and Finding Physics, 2024, 2026

Author:	Wendy Pan
Illustrator:	Cheylon Devine
Editor:	Harmoni Kwok
Answers checked by:	Harmoni Kwok
Typesetting:	Wendy Pan
Images:	All photographs were taken by or on behalf of the author. All diagrams were created by the author. Drawings were created by Cheylon Devine.
Cover design:	Cheylon Devine
ISBN:	978-1-7637082-1-1

Copying for educational purposes

The *Australian Copyright Act 1968* (the Act) allows a maximum of one chapter or 10% of the pages of this book, whichever is the greater, to be copied by an educational institution for its educational purposes provided that the educational institution has given a remuneration notice to Copyright Agency Limited (CAL).

Copying for other purposes

Except as permitted under the Act, no part of this book may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior written permission of the publisher, Finding Physics.

Disclaimer

The author has sought to provide activities and content to address the outcomes in the Physics Stage 6 Syllabus (2027) published by the NSW Education Standards Authority (NESA). Students and teachers are advised to refer to the current NESA syllabus to ensure they have adequately addressed its required outcomes.

This book contains suggestions for practical activities. Teachers and students are advised to conduct a risk assessment prior to any practical activity. The publisher and author bear no responsibility for any injury that may occur when attempting activities mentioned in this book.

Contents

Part 1: Mechanics in 1D

1.1 Describing motion	2
1.2 Describing motion, distance and displacement.....	5
1.3 Numeracy basics for speed calculations.....	7
1.4 Speed and velocity.....	10
1.5 Motion diagrams for constant velocity	12
2.1 Uniform acceleration and frames of reference.....	14
2.2 Uniform acceleration	16
2.3 Visualising acceleration.....	22
3.1 What makes a good experiment?	24
3.2 Experimental skills and errors.....	26
3.3 Linear regression	30
3.4 Experimental skills - g using pendulum	33
3.5 Experimental skills - g using drop time	34
4.1 Motion graphs.....	36
4.2 Motion graphs with vectors	44
5.1 Forces	51
5.2 Introduction to forces	54
5.3 Skydiving and air resistance.....	58
5.4 Forces case study - Air resistance.....	59
5.5 Mass and weight	60
5.6 Forces and constant acceleration	65
5.7 Experimental skills - Forces.....	67
5.8 Forces on two or more objects	69
5.9 Harder force problems – Set 1	71
5.10 Harder force problems – Set 2	74
6.1 Friction and the perfect shoe	77
6.2 Friction.....	79
6.3 Experimental skills - Friction	82

Part 2: Mechanics in 2D

7.1 Vectors in 2D.....	84
7.2 Forces in 2D.....	86
7.3 Subtracting vectors.....	91
7.4 Resolving vectors	93
7.5 Adding more than two vectors	97
7.6 Inclined planes	98
7.7 Experimental skills – Inclined plane.....	102
8.1 Relative motion – whose right?	104
8.2 Relative motion in 1D.....	106
8.3 Relative motion in 2D.....	110
9.1 Work, energy and power	117
9.2 Work	120
9.3 Gravitational potential energy	124
9.4 Kinetic energy	128
9.5 Energy transformations	130
9.6 Power	136
9.7 SI units, dimensional analysis and prefixes	138
10.1 Momentum on skates	140
10.2 Momentum.....	143
10.3 Force-time graphs	147
10.4 Conservation of momentum.....	149
10.5 Elastic and inelastic collisions	152

Part 3: Electricity and magnetism

11.1 Electrostatic – the force of life	158
11.2 Charging objects	161
11.3 Measuring charge	165
11.4 Electrostatic force	167
11.5 Visualising electric fields.....	170
11.6 Electric field strength.....	173
11.7 Electrical potential energy	176
11.8 Voltage and work in electric fields.....	178
12.1 Electric circuits	184
12.2 Circuit basics.....	187
12.3 Voltage and current.....	191
12.4 Resistance, ohmic and non-ohmic conductors.....	193
12.5 Experimental skills – Resistance and resistivity	197
12.6 Electrical energy and power.....	199
12.7 Series circuits	202
12.8 Parallel circuits	207
12.9 Mixed circuit problems	211
13.1 Magnetism and finding true north	215
13.2 Magnetic fields around permanent magnets.....	217
13.3 Magnetic fields around currents	220
13.4 Magnetic field strength.....	224
13.5 Magnetic materials and electromagnet cores	228

Part 4: Waves

14.1 Riding the waves.....	232
14.2 Describing waves.....	236
14.3 Timing waves	239
14.4 Wave speed	240
14.5 Graphing transverse waves.....	244
14.6 Sound waves	247
14.7 Light and electromagnetic waves	251
14.8 Comparing energy in sound and light.....	253
15.1 Inverse square law	255
15.2 Reflection.....	259
15.3 Superposition	262
15.4 Standing waves on strings	265
15.5 Interference from two sources.....	269
15.6 Diffraction.....	271
15.7 Doppler effect	273
15.8 Refraction	276
15.9 Angle of refraction.....	280
15.10 Lenses	282
15.11 Dispersion.....	284
15.12 Total internal reflection	286

Answers.....	289
